

MEME MAFIA

Power. Influence. Wealth.

Whitepaper V1

MEME MAFIA

Power. Influence. Wealth.

The Meme Mafia project and supporting ERC20 digital asset celebrates the incredibly popular meme culture within crypto with an added Mafia-style twist. Organized families and communities can accomplish amazing things! Power, wealth, and influence reign supreme within digital memes, and Meme Mafia captures the love AND the power!

This whitepaper covers the six core features of the Meme Mafia project and its ERC20 digital asset, the MEMEMAFIA token.

- **Built to support Memes**, Tokenomics, Contract Features, and Token Distribution
- **Meme sector voting** of top 10 top-ranked meme projects along with their key stats
- **Buybacks and Staking**, community-voted meme project buybacks and staking
- **Meme Mafia Family NFT Collection** with incredibly detailed bios, traits, and stats
- **Meme Mafia Army NFT Collection** with 1-of-1 memes for the entire sector to collect
- **Pay Off Wallets**, Meme Mafia Army NFTs with hidden content which unlocks that NFT's ownership percentage of a Pay Off wallet's contents

The objective of Meme Mafia is to **create a movement of meme support within the entire digital space**. Everyone has their favorite memes that they support, and Meme Mafia provides a space for the entire meme community to support their projects and have some fun while executing their digital asset strategies.

Welcome to Meme Mafia.

Welcome to The Family!

The entire meme sector can vote for their favorite 2 projects **every 24 hours**.

Vote for your favorite Top 10 Meme Project *

| | |
|----------|-------|
| DOGE | SHIB |
| PEPE | FLOKI |
| BABYDOGE | ELON |
| VOLT | TSUKA |
| AIDOGE | LEASH |

You can vote for (2) projects every 24 hours. Refresh your browser to see new voting results.

The voting period for the posted block ends when the countdown timer reaches zero. At that time, Meme Mafia will spend **50% of all transaction taxes on token Buy Backs** of the top two voted projects! The meme sector is then reevaluated, the timer is reset for 90 days, and a new Top 10 list (live prices and voting) is posted on the website.

It is **highly likely** that new projects will enter the Top 10 as the list resets every 90 days based on meme project market cap values. Newly launched projects might experience rapid growth and could end up in the new Top 10 list for voting and buy backs. Which families will work their way up to that level?

Be sure to **vote every day** as the results of your voting could add significant value to your favorite project(s) and have a positive impact on the value of their digital asset!

Buy Backs & Staking

Project voting is super important because 50% of Meme Mafia transaction taxes are used to execute token buybacks of the top two vote getters.

When the voting timer reaches zero, the Meme Mafia Project Manager will take 50% of all transaction taxes accumulated during that timeframe and will purchase the native tokens of the two vote winners (25% of taxes p/winner). These buy backs could be significant depending on MEMEMAFIA transaction volume.

100% of the purchased tokens are then delivered to the ArchAngel Token Staking Pool where they are added to the Harvest for the next staking pool cycle. Those holders with staked ARCHA earn a percentage of the harvest rewards, and all tokens earned can be harvested to their wallets. The wallet that provided the tokens for staking is the wallet that receives the harvested rewards.

Joining the ArchAngel staking pool is very easy. When you stake your ARCHA tokens, you earn tokens from **every ARCHA ecosystem project**, AND now, with Meme Mafia, stakers also earn the **top ranked and most popular meme tokens in the entire meme sector**.

1. Buy ARCHA (ERC20) on Uniswap (use slippage of 6% or 7%):
0x36e43065e977bc72cb86dbd8405fae7057cdc7fd

2. When the staking pool is open for new staking, visit the ArchAngel official website (<https://archangeltoken.com/>) and click on the **Staking** page link.

3. Connect your wallet, read and accept all the terms, and click on the **Gabriel V3 pool**.

4. Enter the number of ARCHA tokens you want to stake (or use Max for all, 250T max). You will be required to sign two transactions in your wallet, one to interact with the staking pool and the second approval is to transfer tokens to the pool. Manual Harvest occurs every 90 days and Harvest normally lasts for 2 weeks (website always posts dates).

MEME MAFIA

Meme Mafia NFT Collection

There are two parts of the Meme Mafia NFT collection: The Meme Mafia Family and Meme Mafia Army. This page covers the Meme Mafia Family NFTs, and the next page covers the Meme Mafia Army.

Mafia Family NFTs

This incredibly unique NFT collection is **like no other within crypto**. We've created multiple Meme Mafia families, designed highly detailed era-specific characters, and integrated entire family histories, themes, characters, and exact timelines into each family and character. This dynamic NFT collection is more than just NFT art, this is the Meme Mafia history.

Every family has bosses, consiglieres, capos, and hitmen. Each character serves or has served in a specific role and during a specific timeframe. Their character history is entwined within their family's history and integrated with the history of all Meme Mafia families. New families will be added as the sector grows!

Every NFT has a **Bio Card** which contains the character's story, personal details, and 7 key traits which make them even more unique and collectible.

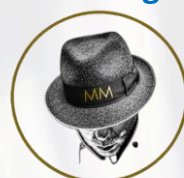

These incredible custom details are also included in each NFT's official description area so that the details are permanently captured as part of the character's family and mafia legacy.

Bosses, Consiglieres, and Capos have a **"Mafia Power Ranking"** based on their traits. Hitmen, Unaffiliated Hitmen, and Black Widows have a **"Mafia Hitman Ranking"** based on their family history and the effectiveness and method of their message deliveries.

Family characters are in continuous development as the family's story and history is expressed through these characters. The website shows the initial families and family members, so follow along as these families and characters come to life!

These are limited mint NFTs that will never be reproduced.

On OpenSea, search for **"MemeMafia"** and look for our logo!

Stevey "Koko" Ruiz
Boss, Simia Family
(2002-2009)

Power Influence. Wealth.

The Ruiz family is a prominent commercial and luxury resort property development family within the United States with roots going back to the 1950's. The family's nucleus of assets resides within the popular and expanding South Beach portion of Miami Florida. Stevey "Koko" Ruiz established himself within the Ruiz family as the guy with the elite connections. He attracted the world's most influential and wealthy people to their exclusive resorts, mostly by discrete invitations to participate in private high stakes gambling events.

In 2002, the Ruiz family invited to Miami other wealthy, connected, and highly influential families from around the world who had similar business models and interests. After a weekend of discussions, the families agreed to combine their models under the Simia banner, and with Koko as their first Boss. They worked together to grow their underworld empire as a single entity. They consolidated their money, resources, and connections to form a highly lucrative business enterprise web.

Koko, along with Simia's first Consigliere (Otis "Abu" Pierce), created a coveted menu of high-stakes events, luxury leisure, and other business opportunities for the world's elite. They coordinated with Simia families around the globe and held secretive high stakes gambling parties at the most luxurious resorts on the planet. Koko also managed highly lucrative investment portfolios for these same clients, exposing them to investment positions in top-ranked gambling and racing venues as well as commercial and luxury property development. He built a cadre of Capos to help keep the businesses, customers, and competitors in line with family operations and initiatives.

Thanks to Koko, the new Simia family's combined resources and influence were maximized to create a global network of unparalleled influence and power. Under Koko's leadership, Simia became "the" go-to family for the world's elite and privileged, and with them came their wealth and international connections.

MEME MAFIA

Meme Mafia NFT Collection Meme Mafia Army (MMA) NFTs

The MMA NFT Collection contains **ONLY 1-of-1 NFTs**. They can be used for PFPs, or you can sell or trade them with other meme enthusiasts and NFT investors. You may end up with a **Pay Off NFT** which means you own a percentage of that collection's dedicated **Pay Off wallet**. Will you hold the NFT until the Pay Off occurs? What will their value be? Will you sell your 1-of-1 NFT to another collector?

Unique & Rare: The MMA provides meme enthusiasts with a unique meme character that exist no other place within the meme world. **These .03 Eth NFTs are all 1-of-1** and will never be minted again. Pick from hundreds of dynamic characters that you love based on characters, themes, or projects that you support such as Apes, popular Inu breeds, Dragons, Frogs, Cats, and Wolves (just to name a few)!

These collections of characters are released by Generation with "Generation 1" being the first collection launched. The Generation 1 collection has 200 NFTs and **12 of those NFTs are designated as Pay Off NFTs**. When an NFT is purchased, the owner unlocks a secure field to see if the purchased NFT is a Pay Off NFT. [Details can be found on the next page of this whitepaper.](#)

Next Generations of MMA

More characters are coming in follow-on MMA Generations to celebrate the continued popularity and success of this awesome digital asset sector. Let's celebrate as much of the sector as possible!

New MMA characters include Bears, Ducks, Emperors, Ninjas, Bulls, Giraffes, Sharks, Crows, and many others. Generation 2 (on onwards) will capture the old and the new family characters.

On OpenSea, search for "MemeMafia" and look for our logo. Meme Mafia Army NFTs (with the special locked Pay Off Wallet content) can be identified by their NFT name "MMA-G1-xxx". Good luck and grab the ones you love!

MEME MAFIA

The Pay Off

Unlock special Meme Mafia Army NFTs for your share of the Pay Off

Pay Off Wallets

Each MMA NFT Collection on OpenSea is assigned a specific Pay Off wallet. The MM Project Manager feeds these wallets with Ethereum from MEMEMAFIA transactions taxes, and the wallets continue to accumulate value until their timers reach zero. Two wallets at a time will be fed with txn taxes (the active collection and the collection that launches next).

Meme Mafia Army Generation 1 NFT Collection: **The Laundry Wallet**

Meme Mafia Army Generation 2 NFT Collection: **The Bakery Wallet**

Meme Mafia Army Generation 3 NFT Collection: **The Bar Wallet**

Meme Mafia Army Generation 4 NFT Collection: **The Market Wallet**

Pay Off NFTs

Each MMA NFT collection has a fixed number of NFTs that are identified as Pay Off NFTs when they are created. Each MMA NFT has locked content that is revealed only to the NFT owner when their wallet is connected to OpenSea. Winning “Pay Off NFTs” reveal the below message when they are unlocked.

Congrats! You have purchased one of the 12 Pay Off NFTs in this collection that earns an even share of the Laundry Wallet! You can hold this NFT and collect those proceeds to this OpenSea wallet when the timer hits zero, or you can sell this NFT to a higher bidder.

Wallet Proceeds

The owners of the Pay Off NFTs in each collection evenly split the contents of that collection’s Pay Off wallet when the timer for that wallet reaches zero.

When all Pay Off NFTs are purchased: If there are 10 Pay Off NFTs in a collection and all 10 have been purchased when the timer reaches zero, then each NFT earns 10% of that collection’s Pay Off wallet.

If only a portion of the Pay Off NFTs are purchased: If there are 10 Pay Off NFTs in a collection but only 5 have been purchased when timer hits zero, then each owners will receive 20% of that collection’s Pay Off wallet. In both examples, **100% of the wallet’s contents** are paid to the owners of the purchased Pay Off NFTs.

Pay Off NFT owners can hold their winning NFT for the Pay Out, or they can sell their NFT to the highest bidder on OpenSea if they want. **How big will the Pay Off wallet get?**

Can a single wallet own more than one Pay Off NFT? Yes, they own a higher percentage of the Pay Off!

Track the Pay Off NFTs and Wallet Contents: Visit the “Pay Off” page on our website to track the Pay Off NFTs as they are purchased **AND** the value of the Pay Off wallet assigned to that collection. Funds are added by the Project Team when the budget is executed, so keep an eye on the value of that wallet before the clock strikes zero!
